General Guidelines

Credit is based on the total amount of the offering sold to the public. Full credit is awarded to the sole bookrunning manager or split equally among joint bookrunning managers; unless full, explicit breakdown of bookrunning is provided by an involved party. Regional and local tables are identified based on factors such as currency, market of issuer and/or country of risk/incorporation.

Fixed Income

All transactions must have a maturity/call/put option of minimum 18 months. Make-whole call and provisional call/put are exempted from this rule. Note: Criteria may vary for some local and/or regional tables. USD denominated 144A/REG S issues are credited 100% to the 144A tranche and 0% to the REG S tranche. Loans

Includes executed syndicated loans transactions. Full credit is awarded to the banks satisfying the highest of the titles. Full credit is awarded to the sole bookrunning manager or split equally among joint bookrunning managers. Credit is allocated to amended or amended and restated transactions, where each modification is 100% at the lender's option and not as a result of events already built into the original credit agreement. Credit is awarded for the following structural changes only: maturity extensions of three months or more, incremental basis for increased in deal size, reduction in pricing, full release of collateral.

Exclusions: Bilateral transactions, transactions with a maturity of less than three months, loans withdrawn prior to signing, amended or restated securitizations, receivable and guarantee facilities, loan pacts, and standalone guarantee facilities/letters of credit.

US Municipals

Standard published tables will award deal credit based on true economic credit as reported by the issuer or the bookrunner. In absence of reported economic credit, 100% will be assigned to the bookrunner.

Dollar value of credit will be assigned based on the percentage allocation reported for economic credit (or designated by the user in a custom table) and applied against the total par value of the bonds issued. Zero coupon bonds (CABS) or intermediate appreciation bonds (convertible CABS) will be included at the market value (accreted value) on the interest accrual date.

All debt issued by municipal issuers will be eligible for league credit. Taxable and tax-exempt debt is eligible for league credit unless a table includes specific tax type criteria. "Tax-exempt" is defined as federally tax-exempt and includes bonds subject to AMT and bonds designated as Bank Qualified.

Each table is provided in three formats. "Economic Credit" displays rankings based on true economic credit allocations of applicable deals. "Left Lead" assigns 100% credit to the bookrunner and 0% to all other syndicate participants. "Deal Count" displays rankings based on deal quantity rather than aggregate economic credit amounts. A "deal" refers to the aggregate series within an issuance led by a particular underwriter or syndicate. For example: a \$50 million issuance is split into three series- a \$10 million Series A, a \$20 million Series B, and a \$20 million Series C. Bank 1 is the underwriter of Series A & B, while Bank 2 is the underwriter of Series C. Bank 1 would have one "deal" worth \$30 million, and Bank 2 would have one "deal" worth \$20 million.

Exclusions: Derivatives, private placements, variable rate preferred securities, municipal commercial paper, and remarketings are excluded from municipal league table eligibility.
