- \$300 million one-time funding for toxic site cleanup and investigations of high-priority contaminated properties, as well as further discussion of the

administration's proposals for changes at the Department of Toxic Substances Control.

- Substantial reserve deposits, such that the administration proposes total General Fund reserves of approximately \$22 billion at the end of 2021-22.

The Governor's Budget summary lists a variety of "immediate action" and "early action" proposals. These include several of the proposals the Governor announced on Dec. 30, Jan. 5, and Jan. 6. The Legislature adopts early changes to the budget plan each year prior to passage of the full budget plan in June. The Legislature and the Governor will discuss the timing and details of early action proposals in the coming few weeks.

In the coming days and weeks, the Department of Finance will post additional information accessible from its homepage [here](#). These include "budget change proposals" (BCPs) that are considered in detail by budget subcommittees, as well as the Governor's budget trailer bill proposals.

This preliminary highlight summary reflects an initial analysis of the proposed budget. The Committee will immediately begin hearings on the entire budget and will provide more detailed analysis and information at that time.
