AI Compliance in a Rapidly Changing Regulatory Environment

Disney's Coronado Springs Resort

1001 W Buena Vista Dr

Lake Buena Vista, FL 32830

SPEAKERS

[Samuel E. "Gene" Fishel](#)

Gene Fishel will be joined by Jared Rinehimer from the Massachusetts Attorney General's Office and Shannon Noon from Hi Noon Consulting to discuss the rapidly evolving regulatory landscape of AI compliance.

As AI technologies become increasingly powerful and embedded in society, regulators at the state, federal, and international levels are acting swiftly to address emerging risks. Organizations that fail to align with these evolving requirements face steep consequences—including financial penalties, reputational harm, and mandated dismantling of noncompliant AI systems. This session offers a comprehensive overview of the current legal and regulatory environment impacting AI developers and deployers, and explores technical and policy strategies for maintaining compliance.
