AI: Impact and Use in the Health Care Industry (Part Three)

Regulatory Oversight Podcast

SPEAKERS

[Stephen C. Piepgrass](#) | [Michael Yaghi](#) | [Barry H. Boise](#)

AI continues to capture the headlines. One recent headline noted that ChatGPT passed the medical boards. In this third episode, Stephen Piepgrass and colleagues Michael Yaghi and Barry Boise discuss the potential risks health care companies may face with increased reliance on AI, as well as the increased focus on AI by various regulators and state attorneys general, particularly in the health care space.

Our panel also offers suggestions on how health care companies can engage with state regulators to discuss the issues, share their perspective on how AI could assist the health care industry, and create an ongoing dialogue with regulators to make sure that private industry and the government are working together.

In part four of this podcast series, we will look at the use and impact of AI in the financial services industry.
