AI in the Operating Room: Liability Issues for Device Makers

The Good Bot: Artificial Intelligence, Health Care, and the Law

SPEAKERS

[Brett Mason](#) | [Eric Rumanek](#) | [Frederick J. King](#)

Join Troutman Pepper Partner Brett Mason for a podcast series analyzing the intersection of artificial intelligence (AI), health care, and the law.

In this installment, Brett Mason is joined by Partner Eric Rumanek and Associate Frederick King to discuss the incorporation of AI software into medical devices used during surgical procedures. As surgical technology advances, several potential liability issues may arise for the manufacturers of these products. This episode examines potential product liability issues that such medical devices may face and design considerations that medical device manufacturers should consider when incorporating AI software into their products.
