**Tuesday, September 24 • 11:15 a.m. – 12:00 p.m. ET**

Gene Fishel and Andrea Hoy will be participating in a fireside chat panel during the upcoming InfoSec World Conference on Tuesday, September 26. The panel will discuss how the integration of AI processes will affect evidence in potential litigation, including both civil and criminal cases. They will explore the need for developers to incorporate compliance measures and evidence retention mechanisms into their processes, addressing regulatory concerns about AI data retention and liability. Additionally, the panelists will discuss rules and regulations for AI data retention, the evidence needed in litigation involving AI, and the implications for developer liability as AI systems become more independent.
