Troutman Pepper's antitrust group is excited to offer its annual Antitrust CLE event. Given the focus of the current administration and antitrust agency leadership on more aggressive enforcement, there is greater uncertainty and risk. Our U.S. and international presenters will offer an in-depth look at major antitrust-related issues and practical guidance and will provide attendees with tools and information to minimize and manage their risks.

Audience participation during four one-hour panels is encouraged, and attendees will have the opportunity to ask questions and engage with presenters during this seminar.
