Anodes, Cathodes, and All Things Lithium-Ion With Guest Connor Hund, Director of Business Strategy and Operations for NanoGraf

Battery + Storage Podcast

SPEAKERS

[William R. Derasmo](#)

The lithium-ion battery space remains hot, and with breakthroughs like the use of silicone anodes and other innovations, it is poised for continued growth.

In this episode, Bill and his guest Connor Hund, the director of business strategy and operations for NanoGraf, discuss the advantages of silicon anodes, creating the world's most energy dense cylindrical battery cell, and what these advances mean for electric vehicles, medical equipment, consumer electronics, and even soldier-worn battery applications.
