Artificial Intelligence Key Legal Considerations

SPEAKERS

Kim Phan | Peter T. Wakiyama

March 25, 2024

This CLE session will explore the evolving application of Artificial Intelligence (AI) in the industrial technology industry, from Research & Development to software coding. The presenters will address critical legal considerations, including privacy, security, and intellectual property (IP) issues. The program will also discuss how to protect sensitive data, comply with privacy laws, and safeguard IP rights in the AI context. Finally, the presenters will explain best practices for building an effective AI policy, ensuring compliance, mitigating risks, and promoting responsible AI practices.
