ATLP 97th Annual Meeting

Baltimore Marriott Waterfront
700 Aliceanna St
Baltimore, MD 21202

SPEAKERS

[Samuel E. "Gene" Fishel](#)

Gene Fishel will be speaking at the upcoming ATLP 97th Annual Meeting on “AI Ethics: Governance, Accountability, and Responsible Innovation.”

The session will address how, as artificial intelligence becomes increasingly embedded in business operations, public services, and critical infrastructure, ethical considerations are moving to the forefront of policy and practice. The panel will examine key ethical challenges posed by AI systems, including transparency, bias, accountability, data governance, and human oversight. Panelists will discuss emerging frameworks for responsible AI development and deployment, the role of regulators and organizations in establishing ethical guardrails, and ways companies can align innovation with public trust and societal values. The discussion will offer practical insights for managing ethical risk while supporting innovation in an AI-driven economy.
