

Cyber Capsule – December 2022

WRITTEN BY

Sadia Mirza | Kamran Salour

Please find our eighth edition of the Cyber Capsule. In this edition, we discuss a brazen botnet, steps to shield the online availability of federal judges' personal information, the price of cybersecurity, and a warning about virtual assistants. As with every edition, we chronicle some amusing happenings in the threat actor world, and close with a reminder about New York's upcoming mandatory CLE requirement.
