Data Management and eDiscovery Issues Caused by Increased Employee Mobility and M&As

SPEAKERS

[Evan Gibbs](#) | [Alison A. Grounds](#) | [Jim Calvert](#)

Wednesday, November 2 • 2:00 – 3:00 p.m. ET

The increase of employee mobility (including moves to competitors) and M&A activity can create data management and eDiscovery issues ranging from theft of top secret information to accidental evidence destruction and spoliation. Please join our panel of attorneys and technologists as they discuss common risks, the legal landscape, and technical insights to mitigate such risks. Our panel will examine legal, technical, and practical strategies to reduce the risks associated with employee mobility, corporate espionage, integrating new data systems, and managing parallel or legacy systems after a merger or spin-off.
