

## Driving Innovation With AI-Focused Consulting

---

Feedback from our clients highlights varied AI adoption, with some clients expressing skepticism about AI's current value in legal departments and others actively piloting and integrating AI tools into their operations. This disparity highlighted the need for enhanced AI strategies and consulting to bridge the gap.

### Our Approach

Our Client Experience and Knowledge Management and Innovation teams offer tailored AI consulting services aligned with each client's specific context. Through direct client engagement and pilot project collaboration, we are able to craft bespoke AI solutions that drive innovation and operational efficiency for our clients.

### The Outcome

We have empowered clients to integrate AI seamlessly into their business and legal functions leading to increased workflow efficiency and stronger operational analytics. Our consulting insights help position our clients at the forefront of AI innovation in law.
