# Electro-Extraction and the Future of E-Waste with Megan O'Connor, CEO and Co-founder of Nth Cycle

## Battery + Storage Podcast

### SPEAKERS

[William R. Derasmo](#)

---

With the ever-increasing production of electric vehicles and our continued dependence on lithium-ion batteries, one key question persists: What happens when a battery reaches its end of life?

In this episode, host Bill Derasmo and his guest Megan O'Connor, CEO and co-founder of Nth Cycle, discuss Nth Cycle's modular technology that solves major challenges for recyclers and provides a greener alternative to today's chemical processes.
