EV Tech Series: IP Enforcement at the ITC and Federal Courts

Battery + Storage Podcast

SPEAKERS

[William R. Derasmo](#) | [Gregory D. Len](#) | [Frank D. Liu](#)

Over the past decade, there has been a significant push in investing in green and renewable technologies, particularly in battery, solar, and wind technologies. As a result, an increase in patent filings in this space has occurred, especially around battery technology as the transition to electric vehicles speeds up.

In the first episode of our *EV Tech Series*, host Bill Derasmo and his guests, fellow Troutman Pepper Partners Greg Len and Frank Liu, discuss all things patent litigation — from concerns about current patent litigation to the public forums for patent litigation to green energy patent litigation trends. You don't want to miss their takeaways on the future of green energy patent litigation.
