Expected 2025 Trends in Restructuring and Distressed M&A

Many of the developments from increased restructuring activity in 2024 will shape the trends we expect to see in 2025

WRITTEN BY

Alex R. Rovira

Many of the developments from increased restructuring activity in 2024 will shape the trends we expect to see in 2025, including increased use of liability management transactions, increased distressed M&A activity, a surge in private equity and private credit and increasingly active lenders. This article explores these trends and their implications for the middle-market ecosystem in the coming year.
