We are pleased to announce the release of our latest whitepaper, [Fueling Up: How to Make U.S. Clean Hydrogen Projects Happen](#). This comprehensive report explores the critical steps needed to unlock the potential of clean hydrogen in the U.S., and the related challenges faced by developers and utilities.

Our report addresses key topics such as the need for certainty on tax credits, improved certification standards to boost off-taker confidence, and supporting strategic investments in domestic manufacturing and infrastructure. We also discuss the potential for the U.S. to become an exporter of clean hydrogen and related products.

[Download the whitepaper here](#) to gain valuable insights and to learn how to navigate the complexities of this emerging sector.

Troutman Pepper’s market-leading energy and environmental practices help clients with their most important and complex matters throughout the U.S. From renewables to conventional and emerging technologies, the cross-disciplinary team has extensive experience across the energy landscape. The firm regularly advises automobile manufacturers, charging station companies, automotive suppliers, independent power producers, banks, utilities, private equity funds, and large corporations.
