Get Wind of This: BOEM's Gulf of Maine Offshore Wind Lease Sale

RELATED PROFESSIONALS

[Emily Huggins Jones](#) | [Josh Kaplowitz](#)

The Bureau of Ocean Energy Management (BOEM) is poised to hold its largest offshore wind lease sale ever this October, auctioning as many as one million acres in the Gulf of Maine off the coasts of Maine, New Hampshire and Massachusetts. It's enough acreage to generate 13-18 GW of emissions-free electricity to meet New England's ever-growing demand for power. Join representatives from BOEM, Maine and Massachusetts for a candid discussion with Locke Lord's Offshore Wind team about how we got here, what development challenges await future Gulf leaseholders, and the sale's implications for state power procurement, ports and supply chain growth.

Wednesday, September 18

5:00-6:00 pm ET – Presentation

6:00-7:00 pm ET – Reception

Moderators:

[Josh Kaplowitz](#), Locke Lord LLP

[Emily Huggins Jones](#), Locke Lord LLP
