Gulf Coast Power Association 34th Annual Spring Conference

Locke Lord is a proud sponsor of the Gulf Coast Power Association Spring Conference taking place virtually on April 27-29.

Since 1983, GCPA has served as a forum for discussion of the most pressing issues affecting the electric power industry and emerging electric markets. The recent winter storm and widespread system outages created tremendous hardships for electric customers across Texas and the Gulf Coast area. Market performance during and after the storm has stimulated questions about the fundamentals of ERCOT's market design, supply chain security, and financial market stability. The GCPA community of electric industry professionals has an important role and opportunity to examine these issues so that we can all make more informed judgments, business and policy decisions for the future of this market and the security of all electric customers.
