Insurers See Tech R&D Potential in MGAs

RELATED PROFESSIONALS

Nicholas T. Scott

Nicholas Scott, counsel in Troutman Pepper Locke's Insurance + Reinsurance Litigation Group, was quoted in the April 13, 2025 *Digital Insurance* article, "Insurers See Tech R&D Potential in MGAs."

The future of MGAs as R&D hubs for insurance will be boosted by "reinvigoration and facilitation of the agency captive model," said Nick Scott, counsel, Troutman Pepper Locke. "There used to be only a small handful of states that had this. The cohort of states that allow MGAs to set up agency captives as reinsurers has grown." There are now 25 U.S. states that have agency captives.
