---

Join Locke Lord, InsurTech NY and InsurTech Hartford for the next installment of the InsurTech Legal Academy webinar series on legal and regulatory issues impacting the InsurTech industry. Each quarter, we'll tackle a new important topic.

[Brian Casey](#), [Benjamin Sykes](#) and [Alexander Cox](#) will present "Data Privacy & Security for InsurTechs" on August 23 at 1:00pm ET. Privacy and data security compliance matters for InsurTechs have never been more important and challenging. This webinar will focus on the key issues, including recent changes to the CCPA and other states' omnibus privacy laws, crucial requirements for NYDFS Part 500 (and the ramifications for non-compliance), the NAIC Insurance Data Security Model Law and changing state insurance Gramm-Leach-Bliley Act privacy and security regulations. Discussion will include both education on these laws and how they interact with commonly used insurance data analytics tools.

CLE and CE credit pending.
