Interview With Paulo Misk, CEO of Largo Resources

Battery + Storage Podcast

SPEAKERS

[William R. Derasmo](#)

Troutman Pepper energy partner Bill Derasmo talks with battery and storage experts from across the industry. The podcast shares the unique perspectives of industry veterans and thought leaders, exploring how they are deploying this new and exciting technology.

In this episode, Bill interviews Largo Resources CEO Paulo Misk, where they explore Largo's long duration energy storage solution, which uses a vanadium redox flow battery (VRFB). This episode represents a bit of a departure from previous episodes, which have focused largely on shorter duration lithium ion-based storage. The podcast also includes a discussion on Largo's unique "vertically-integrated" business model.
