Meeting the Demands for Battery-Grade Lithium With Dr. Saad Dara of Mangrove Lithium

Battery + Storage Podcast

SPEAKERS

[William R. Derasmo](#)

With burgeoning EV sales, the transition to renewables, and IRA implementations, the need for battery-grade lithium is higher than ever. However, supply chain issues continue to slow down production, causing a major imbalance between supply and demand.

This week, Bill Derasmo and Dr. Saad Dara discuss Mangrove Lithium's novel electrochemical refining process for producing battery-grade lithium, and how they turn overseas refining into a thing of the past.
