---

**Wednesday, December 6 • 2:00 – 3:00 p.m. ET**

**Wednesday, December 13 • 2:00 – 3:00 p.m. ET**

Please join us in our two-part webinar series, where our esteemed panel of attorneys and technologists will delve into important eDiscovery considerations for organizations using Microsoft 365. The panelists will discuss key areas of common concern:

- The impact of generative AI, including Copilot.
- Legal holds, searches, and exports.
- Versioning and cloud attachments.
- Teams-specific challenges.
- Case law developments.

Session 1: Wednesday, December 6

[WATCH HERE](#)

In part one, we will discuss several of the most common challenges confronting organizations using Microsoft's Purview eDiscovery features and how to address them. We will highlight some recent changes made to Purview and preview several on the roadmap for 2024. Recent case law construing parties' eDiscovery obligations relating to Microsoft 365 will also be reviewed. The interactive session will offer attendees a unique opportunity to share their personal experiences, insights, and best practices related to conducting eDiscovery in Microsoft 365.

Session 2: Wednesday, December 13 (Optional)

[WATCH HERE](#)

In part two, we will perform a deeper technical dive into Microsoft Purview eDiscovery, sharing valuable insights and best practices. This advanced session will showcase the capabilities of Microsoft Purview eDiscovery (Premium), the feature set available to corporations equipped either with an E5 license or with E3 plus the Compliance add-on. We will demonstrate the often untapped potential of Purview eDiscovery (Premium), providing

attendees with practical knowledge on how best to exploit its functionality. This session is specifically designed to be beneficial to technologists and legal professionals with primary day-to-day responsibility for Microsoft Purview eDiscovery within their organizations.

Additional speakers include: Antonio Avant, Stephen Simmons, and Adam Smith.
