We are pleased to share with you our latest publication, “Navigating Change: First 100 Days under the Trump Administration,” authored by our Digital Assets + Blockchain team. This retrospective examines the pivotal developments in the digital assets industry during the initial phase of the Trump administration.

The first 100 days were marked by significant changes across various levels, including federal government actions, state and federal legislative initiatives, regulatory updates, and industry advancements. As the new administration began to shape its policies, the United States navigated its approach to cryptocurrency and blockchain technology, setting the stage for future financial innovation.

Our Digital Assets + Blockchain team offers comprehensive services for both emerging and established participants in the digital asset markets. We provide seamless support in areas such as corporate, regulatory compliance, intellectual property, data use, privacy, litigation, cybersecurity, tax, and more. Our team is experienced with cryptocurrencies, Web 3.0, regulatory due diligence, blockchain technology, and other peer-to-peer distributed ledger technologies, including smart contract platforms.

We invite you to explore the insights and analyses provided in this publication, which aim to shed light on the evolving landscape of digital assets during this transformative period.
