

Optimizing Legal Department Efficiency

An international commercial real estate investment company with a large legal department faced difficulties identifying the appropriate attorneys internally with specific legal expertise. This lack of clarity created inefficiencies and delays in accessing the right legal resources within the organization for specific needs.

Our Approach

We developed an advanced AI-powered solution to help the client efficiently navigate its internal legal department roster and quickly identify attorneys with the expertise that aligns with the client's immediate business needs.

The Outcome

The implementation of the tool significantly enhanced legal department operations. The tool significantly reduced the time and effort required to find the right legal expert, enhancing overall departmental efficiency. As a result, the client can now swiftly connect with the appropriate legal professionals, ensuring timely and effective legal support for its needs.
