Power Struggles: Innovating Around Energy Challenges in U.S./International Data Center Development

SPEAKERS

[Ben Henry](#) | [Carl H. Bivens](#)

In Episode 1 of our Data Centers series, Carl Bivens and Ben Henry – who lead our data centers group – discuss their complementary international and domestic practices, the growing energy demands of data centers globally, and how the industry and markets are innovating to keep the lights on.

Topics covered include:

- Introduction: Building a Global Data Center Practice
- Power Supply Challenges in Primary Data Center Markets
- Innovative Solutions: Grid Upgrades and Behind-the-Grid Developments
- Impact on Developers and End Users
- Complementary Perspectives – U.S. and Abroad
