Preventative Medicine: Health Care AI Privacy and Cybersecurity – Part 2

The Good Bot: Artificial Intelligence, Health Care, and the Law

SPEAKERS

[Brett Mason](#) | [Brent T. Hoard](#)

Join Troutman Pepper Partner Brett Mason for a podcast series analyzing the intersection of artificial intelligence (AI), health care, and the law.

In this installment, Brett is joined by Partner Brent Hoard and Andrea Bilbija, chief compliance officer at Sprinklr, to address the privacy and security implications of using AI software and tools. Their discussion covers current applications for AI, privacy and security risks associated with AI, and best practices for risk mitigation, including internal considerations of data collection and use, contracting with clients and vendors on data privacy issues, and who internally at a company should be involved in governance and compliance around use of AI tools.

The views expressed in this podcast episode do not necessarily reflect those of the organizations with which the speakers are associated.
