

Seeing Beyond Today

We see many common challenges facing legal operations departments at our clients. How can we help them learn from their shared experiences in achieving their mission to reduce corporate risk and manage legal matters more efficiently?

Our Approach

We created and hosted Horizons Legal Ops Summit, an interactive conference that provides an opportunity for legal ops professionals to share insights, discuss challenges, and shape a strategic vision for their organizations, as well as learn from outside experts on key topics.

The Outcome

Since its inception in 2023, we have hosted over 80 attendees representing over 30 different clients across all Horizons Legal Ops Summit events. Sessions have addressing topics such adding value as a law department; generative artificial intelligence; developing trusted, beneficial relationships with outside counsel; strategic change management; effectively navigating pressures on legal spend; and increasing efficiency through enterprise contract lifecycle management. Further events are in development.
