Soaking Up the Sun

SPEAKERS

[Vaughn H. Morrison](#)

Host Vaughn Morrison sits down with Darin Green of Array Technologies to explore how “engineered simplicity” in solar trackers is reshaping the economics of utility-scale solar and storage. They discuss how smarter tracking hardware and controls can make repowering older projects faster and more cost-effective, the growing trend of pairing batteries with solar in the repowering context, and what developers should know about domestic content, FEOC, and IRA incentives as they plan their next generation of projects.
