# The AI Chatbot Wiretap Class Action Wave

## SPEAKERS

[Robert Austin Jenkin, II](#)

---

Robert Austin Jenkin, II spoke on “[The AI Chatbot Wiretap Class Action Wave](#),” as part of the Federal Bar Association webinar, held on June 26, 2026.

The program maps the statutory and case-law architecture driving the wave, then equips defense counsel to analyze the leading liability theories, mount early standing challenges, address predominance issues at class certification, evaluate exposure against current settlement benchmarks, and build compliant consent architecture, vendor agreement restructuring, and server-side design intended to eliminate the “interception” element. Attendees will be able to triage a complaint, sequence dispositive motions, and harden a chatbot deployment against the next filing.
