The Intersectionality of Fermata Energy's Vehicle-to-Grid Technology With Founder and CEO David Slutzky

Battery + Storage Podcast

SPEAKERS

[William R. Derasmo](#)

Can money be made off of parked cars? With vehicle-to-grid (V2X) technology, an EV can pay for itself. Even utilities can access V2X value streams, if they're willing to embrace the change.

From bidirectional technology to frequency regulation, join host Bill Derasmo and his guest Fermata Energy Founder and CEO David Slutzky as they discuss the ins and outs of Fermata's V2X technology and its impact on the auto and electric power industries.
