The Silicon Switch-Up

SPEAKERS

[William R. Derasmo](#)

Host Bill Derasmo sits down with Jonathan Tan, CEO and co-founder of Coreshell, for a deep dive into how U.S.-made silicon anodes could reshape the global battery industry. Their conversation unpacks Coreshell's approach to producing low-cost, domestically sourced silicon anodes designed to replace Chinese-sourced graphite — an innovation with major implications for supply chain security, national competitiveness, and the future of electrification. For anyone tracking the next wave of battery technology or the geopolitics of energy storage, this episode offers insight you won't want to miss.
