Treating Batteries ‘Like Infrastructure’: EnerVenue CEO on its Nickel-Hydrogen Energy Storage Vessels

RELATED PROFESSIONALS

[William R. Derasmo](#)

William Derasmo, a partner in Troutman Pepper Locke’s Energy industry group, was quoted in the April 21, 2026 *Energy-Storage.News* article, [“Treating Batteries ‘Like Infrastructure’: EnerVenue CEO on its Nickel-Hydrogen Energy Storage Vessels.”](#)

In a 2025 guest blog for *Energy-Storage.News*, [William Derasmo, partner at US law firm Troutman Pepper Locke](#) noted that “Energy storage systems co-located with data centres need to be able to function effectively in more confined surroundings. Innovation is a must, and one solution that developers are exploring with optimism is the vertical stacking of storage containers to make the most of limited floor space.”
