---

**PHILADELPHIA** – Troutman Pepper client iECURE, a gene editing company focused on the development of mutation-agnostic in vivo gene insertion, or knock-in, editing therapies for the treatment of liver disorders with significant unmet need, recently announced the completion of a \$65 million Series A-1 financing. The Series A-1 financing was co-led by Novo Holdings A/S and LYFE Capital with significant participation from existing investors Versant Ventures and OrbiMed Advisors. [Read a company press release about the financing.](#)

iECURE expects the proceeds from the Series A-1 financing to enable the advancement of the company's lead program, GTP-506, including funding IND-enabling studies, starting clinical trials (subject to regulatory approval), and achieving early human data readouts. Additionally, the Series A-1 financing is expected to fuel progress on iECURE's portfolio of gene editing products for the treatment of patients with rare liver diseases, including citrullinemia type 1 (CTLN1) and phenylketonuria (PKU).

The Troutman Pepper team advising iECURE in the financing was led by Rachael Bushey, James Jumper, [Stephen Fox](#), and Neil Doogan.

Troutman Pepper's leading life sciences and health care practice counsels clients at all stages of the health care continuum – from drug development to clinical care – from emerging biotech to global pharma. The firm takes an integrated, interdisciplinary approach to counsel clients' complex, evolving needs, providing critical support including intellectual property prosecution and litigation, corporate finance and governance, privacy and cybersecurity, litigation, regulatory, and enforcement.
