With state legislatures reconvening for 2026, numerous states are considering privacy and AI bills on a broad range of topics. In the AI space, these bills cover high-risk activities, chatbots, pricing, disclosures, provenance, employment, and health, among other topics. In the privacy space, these bills cover consumer data privacy, teen's privacy, biometric privacy, consumer health data privacy, and data brokers. During this webinar, we will provide a high-level overview of the types of bills introduced to date, the states where we are seeing the most activity, and what to expect as the year unfolds.
