Unauthorized Access: An Inside Look at Incident Response

Unauthorized Access Podcast

SPEAKERS

Sadia Mirza | Kamran Salour

Unauthorized Access provides an insightful and interesting recap of the latest developments in cybersecurity. Each month our (mildly funny) hosts, Kamran Salour and Sadia Mirza, will discuss updates on legal developments and industry trends, and share real incident response stories and lessons learned. Kamran and Sadia will also talk with industry experts (*e.g.*, individuals from forensics, insurance, law enforcement, and information security) about the current cyber landscape and where it is headed. The goal for this podcast is to keep you educated and entertained about all things cybersecurity.

If you have a fever for IR – the prescription is *Unauthorized Access*.
