

Using Feedback to Enhance Operations

Our private equity clients often tell us in feedback interviews that managing their internal operations continues to be an ongoing challenge. PE firms often have small in-house legal teams and need more help from outside resources.

Our Approach

We have worked with PE firms on a number of projects to assist with operations management, including developing web-based solutions to help them access deal documents, track regulations, and monitor competitors. We have also advised clients on implementing contract lifecycle management solutions.

The Outcome

The new technology tools have helped increase efficiencies for PE clients and our attorneys and are a vital resource for in-house legal teams. Client satisfaction and confidence in the firm has grown exponentially.
