OVERVIEW

Daniel brings a robust background in intellectual property law, focusing on patents, trademarks, IP litigation, and licensing. As a licensed professional engineer, he leverages his technical background to help clients protect their innovations across various high-tech industries, including industrial networks, smart homes and buildings, ruggedized connectors and electronic components, financial services, blockchain technology, information technology, drilling and fracking equipment, gaming machines, power conversion and distribution, AI-based virtual agents, and semiconductor memory. Daniel's engineering experience at Texas Instruments Incorporated provides him with a unique perspective on the technical and legal challenges clients face.

Daniel represents a diverse range of clients, from global financial institutions to downhole drilling equipment manufacturers, in patent infringement actions. He also assists leading technology companies develop strategies for safeguarding their intellectual property, including preparing and prosecuting patents and trademarks for clients' key products and services.

Daniel brings a comprehensive approach to intellectual property protection that combines his legal acumen and engineering background. His dedication to understanding the intricacies of each client's technology helps them protect their innovations and maintain their competitive edge.
