Karlie helps clients achieve and maintain environmental compliance in line with their corporate strategy and business goals.

OVERVIEW

Karlie assists clients in all areas of environmental compliance for existing operations and environmental due diligence for real estate and equity transactions. Clients turn to Karlie when they are acquiring a property or company, and then rely on her environmental compliance counsel post-acquisition.

Karlie has considerable transactional experience, working closely with the client's deal team to assess and mitigate environmental risk and to find a workable solution for each asset or equity transaction. She partners with her development clients to ensure that environmental risk is properly allocated and to ensure that environmental issues are addressed throughout development. Karlie's experience includes cleanup actions and transactions involving hazardous substances and wastes, underground storage tanks (USTs), state hazardous waste and petroleum cleanup programs, Brownfields and Voluntary Cleanup Programs across the U.S., and advising on risks and mitigation measures with respect to vapor intrusion. She also has considerable experience advising clients on environmental diligence strategy for data center development.

Karlie's environmental compliance work includes counseling clients on regulatory compliance and permitting for operations, particularly under RCRA, CERCLA, and EPCRA, and has included obtaining permits and building compliance programs for large-scale, national programs to help clients meet sustainability goals. She also has considerable experience advising retailers in various industries, from grocers and pharmacies to auto-related retailers and distributors. Karlie also defends federal and state environmental enforcement actions, and she advises on facility-wide environmental compliance issues. She also advises clients across multiple industries on compliance with extended producer responsibility (EPR) laws, including state packaging, paper, electronic smoking devices, textiles, and food serviceware programs.

Karlie strives to find solutions that both achieve environmental compliance and are practical for each client. To do this, she works hard to understand each client's corporate strategy, business goals, and day-to-day operations and challenges.

REPRESENTATIVE MATTERS

- *Data Centers*: Providing comprehensive environmental due diligence advice for the acquisition and

development of multiple data centers in Georgia, ensuring compliance with relevant regulations and mitigating potential environmental risks, including advising on the Georgia Brownfield Program.

- *Due Diligence and Brownfields*: Represented a national restaurant chain with respect to environmental due diligence for commercial real estate transactions. Representation also included advising on potential liability and regulatory considerations, entering sites in state Brownfields programs, and negotiating contractual provisions. Advised on appropriate environmental precautions related to renovation or other construction projects at properties already owned or leased by clients.
- *Automotive Environmental Compliance*: Represented automotive retailers, including car dealerships, related to obtaining any required environmental permits, properly managing hazardous waste streams, and establishing and maintaining an environmental compliance program.
- *Retail Hazardous Waste Management*: Represented a national retailer regarding hazardous waste compliance, including, for example, assisting the client in building a comprehensive, national hazardous waste compliance program, and negotiating vendor contracts on behalf of the client.
- *Pharmaceutical Hazardous Waste Management*: Represented a national pharmacy chain and national grocery chains on hazardous waste management of retail products and pharmaceutical waste under federal and state regulatory schemes, such as RCRA, including negotiating settlement agreements, building and improving hazardous waste management programs, and responding to notices of violation.
- *Sustainability and ESG Efforts*: Assisting a national distributor in the rollout of a nationwide sustainability initiative, including obtaining environmental permits in 48 states with distinct, state-specific regulatory frameworks, advising the client on differing compliance obligations from state to state, and helping the client to build a consistent program that is both compliant and practical for operations in every state; assisting the client with negotiating contracts with vendors to help ensure environmental compliance and to maximize vendors' use of recycling; and leveraging firm technology resources to help the client's business teams track progress, as well as leveraging non-attorney timekeepers with technical expertise.

AWARDS
