D 203.353.6836

OVERVIEW

Michael focuses his practice on patent prosecution primarily in the fields of mechanical & medical devices and surgical robotics. He prepares new utility and design patent applications and responses to U.S. and foreign official actions, performs patent searching and provides assistance with preparation of opinions.

He has additional experience in industrial and laboratory equipment, automotive, aerospace, consumer packaging, systems and fixtures for retail product displays, water purification, and building & construction technologies.

REPRESENTATIVE MATTERS

- Assisting a surgical robotics company in obtaining domestic and foreign patent protection for various aspects of their systems.
- Assisting a medical device company in obtaining patent protection for surgical access ports, smoke evacuation, and related technologies.
- Assisting a small medical device company in obtaining domestic and foreign patent protection.
- Assisting a global retail technologies company in growing its patent portfolio.
