# Privacy + Security Advisors

Privacy + Security Advisors

## OVERVIEW

Our Privacy + Cyber team includes prominent former industry chief privacy officers, chief information security officers, and consulting/auditing professionals, as well as individuals who served with or as consultants to the Federal Trade Commission, U.S. Department of Health and Human Services, the Office of Civil Rights, the Consumer Financial Protection Bureau, the Securities and Exchange Commission, and state attorneys general. As a result, our unique integrated team and front-line industry experience extend our range of services beyond those offered by other law firms, including legal, technical, forensic, AI, data, and compliance capabilities.

Our innovative approach and combination of talent are one reason the *Financial Times* shortlisted our firm for its 2023 Innovative Lawyers in Cyber Security & Data Protection award, one of only five such practices in North America.
