Scott handles all aspects of patent prosecution and litigation matters. His comprehensive understanding of complex technologies, coupled with a strategic approach to both prosecution and litigation, make him an asset for businesses navigating the intricacies of patent law.

OVERVIEW

Scott focuses his practice on patent prosecution, litigation, and licensing, particularly in the realms of mechanical and medical devices, aerospace, and systems. His patent prosecution work includes preparing applications for a diverse array of technologies, such as surgical devices and robotic surgical systems, gas turbine engines and fuel control systems, and consumer packaging and paperboard manufacturing.

Scott's litigation experience spans district courts nationwide, handling cases involving surgical insufflation systems, fluid filtration devices, fuel control systems, automotive superchargers, and network monitoring systems. He also represents clients in inter partes review proceedings conducted before the Patent Trial and Appeal Board.
